

“Digging Deeper” - Children’s conversation with the gardeners of our school

The gardeners explained the students of Std 2 how to plant seeds, take care of them as they grow, and showed them their tools which help the plants to thrive. They described the process of growth, where each plant develops and grows over time.

After a truly enlightening session, the children expressed their gratitude by crafting heartfelt cards, like colorful tokens of thanks, to show their appreciation for the gardeners' knowledge.
