

International Day for the Conservation of the Mangrove Ecosystem

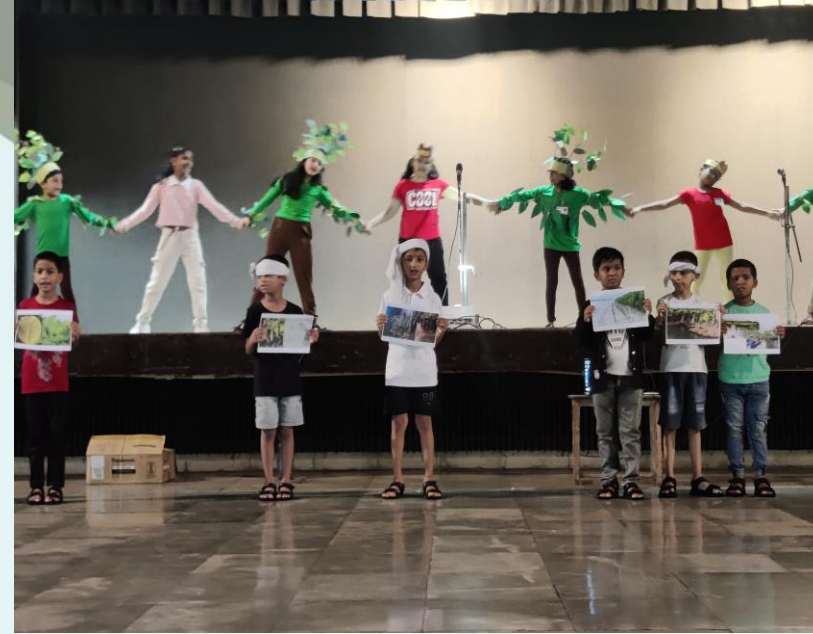

26th July 2024

The children in Jonelle Teacher's class performed a prayer programme to celebrate The International Day for Conservation of the Mangrove Ecosystem.

The skit gave insight into the mangrove forest, highlighting the key features of the mangrove flora and fauna. The students also focused on the threats to the forest and the value communicated was to protect the mangroves as they are useful and provide selflessly for human need.

The students danced, sang a song and quizzed their classmates. A pledge was taken to conserve the environment.

Jonelle Teacher and Priya Ma'am spoke about the importance of mangroves and how the Godrej family plays a pivotal role in protecting the mangroves in Vikhroli.
