Life Below Water

SDG 14

What is an ocean?
An ocean is a large body of water that covers most of the earth's surface. It contains 97% of all water on the earth.

The Five Oceans of the World:

- Arctic Ocean
- Pacific Ocean
- Indian Ocean
- Atlantic Ocean
- Southern Ocean

Target 14-1: Reduce marine pollution
Target 14-2: Protect and restore marine ecosystems
Target 14-3: Reduce ocean acidification
Target 14-4: Sustainable fishing
Target 14-5: Conserve coastal and marine areas
Target 14-6: Reduce subsidies contributing to overfishing
Target 14-7: Increase the number of people with sustainable and resilient livelihoods in coastal and marine areas
Target 14-A: Increase scientific research and technology for ocean health
Target 14-B: Support small-scale fisheries
Target 14-C: Implement and improve legal, policy, and governance

Photograph

After their adventure to the sea bed, they are happy to have prepared this photograph showing the following information:

Poem: Guardians of the Blue

The ocean is full of treasures so grand,
Fish, coral and seashells all over the sand.
It gives us fresh air, food and rain.
A precious resource we must sustain.
But dangers are lurking beneath the blue,
Over fishing and drilling harm life too.
Plastic and oils, they hurt and they sting,
Endangering creatures with every new thing.
Trash in the water, it floats all around,
Harming the turtles and whales that are found.
Chemicals poison the wave and the shore,
We must take action and pollute no more.
So let's work together, both me and you,
To keep the ocean clean and blue.
Recycle, reduce and protect everyday,
To help our oceans in every way.

Homophones

fish	fish	fish
shell	shell	shell
